INTRODUCTION

The Pine Plains Library was founded in 1798 as a membership organization with a \$2.50 membership fee. In 1874 the status of the library changed to a tax supported public library. The original charter was granted in 1895 followed by a provisional charter in 1950 and an absolute charter in 1960. The provisional charter paved the way for the library to change from an association library to the municipal library that it is today, with its budget approved by the Town Board.

In 2016, Library Director Marguerite Hill and the Pine Plains Free Library Board of Trustees developed the Library's first Strategic Planning committee to conduct a community survey and develop goals and objective for five years of Library operations. In 2021, this plan expired and the Board with its current Director, Alexis Tackett, sought to assess how the Pine Plains Free Library did on those goals and create the path for the next five years.

In this review, the Pine Plains Free Library realized a substantial increase in library services over the past decade, with a substantial portion of that beginning after the adoption of the first Strategic Plan. From 2016 to the end of 2019, the Library saw a 70% increase in circulation, an almost 225% increase in program offerings, and over 300% increase in attendance. Although COVID-19 slowed these numbers in 2020, current projections for 2021 has the Library back to pre-pandemic levels and growing.

As Pine Plains continues to see growth and development as a community, and as the Pine Plains Free Library approaches 225 years of operation in 2023, the Library Board and staff are committed to meeting the growing patronage and demand for the users of the Library. The focus on sustainability remains of upmost importance to all involved in the Strategic Planning process to ensure the library's commitment to serving its users for the next 225 years.

ABOUT THIS REPORT & THE STRATEGIC PLANNING PROCESS

This strategic plan has been developed by the Library Director and Board of the Pine Plains Free Library in order to develop a five-year plan and to provide a disciplined approach to updating and refocusing our services in light of our community's needs and the changing role of libraries. A community survey was conducted in September of 2021 in order to gain public feedback to better establish goals and objectives. This process could not have been done without the community's involvement and the Board of Trustees would like to thank those community members for their participation.

This report looks at several aspects of the role the library serves in the community and addresses an update to the mission, vision and values of the Library that have come out of the strategic planning process. This report also lays out the goals and objectives for long range planning over the next five years. At the end of the report you will find success metrics that define ways the library and our constituents may assess our achievement of this strategic plan.

The strategic planning process began in September 2021 and the plan was submitted to the Board and approved in September of 2022. Over 150 people participated in some way in the planning process which included community survey, facility survey, demographic analysis, and comparisons of the Pine Plains Free Library to other local libraries and small community libraries nationally.
